

S1000D Users Forum 2010

“Application of S1000D within a state-of-the-art Integrated Logistic Support environment”

ATA Overview
Brad Ballance
Air Transport Association

Overview

1. Air Transport Association (U.S. airlines)

- Background/History
- Membership/Role/Mission

2. ATA e-Business Program (International)

- Vision/Mission/Scope
- Organizational Structure
- Membership
- Collaboration

3. Q&A

Air Transport Association

- Airline trade association - not-for-profit
- Based in Washington D.C. - 80 Employees
- Founded 1936 by 14 airlines
- Current membership – 19 airlines
 - 11 Passenger Carriers
 - 5 All-Cargo Carriers
 - 3 Associate Members (International Airlines)
- Member carriers handle 90% cargo/passenger traffic in the U.S.
 - Industry Membership/Partners (non-airlines)
 - 47 Companies

Air Transport Association Members

Airline Members

ABX Air, Inc. (GB)

AirTran Airways (FL)

Alaska Airlines, Inc. (AS)

American Airlines, Inc. (AA)

ASTAR Air Cargo, Inc. (ER)

Atlas Air, Inc. (5Y)

Continental Airlines, Inc. (CO)

Delta Air Lines, Inc. (DL)

Evergreen International Airlines (EZ)

Federal Express Corporation (FX)

Hawaiian Airlines (HA)

JetBlue Airways Corp. (B6)

Southwest Airlines Co. (WN)

United Airlines, Inc. (UA)

UPS Airlines (5X)

US Airways, Inc. (US)

Associate Airline Members

Air Canada (AC)

Air Jamaica Ltd. (JM)

Mexicana (MX)

ATA Purpose

- Purpose is to foster a business and regulatory environment that ensures safe and secure air transportation and enables airlines to flourish, stimulating economic growth.
- Non-competitive issues
- History
 - Creation of the Civil Aeronautics Board
 - Creation of the Federal Aviation Administration
 - Creation of the air traffic control system
 - Airline deregulation
 - Aftermath 9/11

ATA Activities Today

- Reauthorizing FAA
- Modernizing the air traffic control system
- Stopping oil speculation from driving up fuel prices
- Advocating fair airline taxation and regulation
- Transmitting technical expertise and operational knowledge to improve safety, service and efficiency
- Publishing numerous guidelines and standards
 - [e-Business \(through the ATA e-Business Program\)](#)
 - Operations
 - Safety
 - Other/Misc

ATA e-Business Program

- International standards program
- Membership open to the world's airlines, suppliers, repair agencies, solution providers, etc.
- Consensus-based
- Independent business unit (not for profit)
 - Separate membership from ATA
 - 119 Member companies
 - 1,660 Individual volunteers
- Vision, mission, strategy and goals

ATA e-Business Program - History

- Beginning – late 1950s
 - Spec 100 – Technical Data Standards
 - Spec 200 – Materiel Data Standards (IBM Punch Cards)
- Standards Evolved and Expanded
 - Changing business needs
 - Technological advances
- Today
 - Broad list of standards and data definitions
 - Long list of adopters
 - Standards deeply embedded in industry systems and processes

Vision

- To be an agile, cost effective, global commercial aviation industry enabled through effective and efficient information sharing.
 - Information is as dynamic as the business environment
 - Business models can be effectively adjusted in a timely manner as conditions require
 - Minimal data processing for distribution or consumption
 - Information is complete and ready for consumption when provided

Mission

- Establish a global commercial aviation industry **information framework** that facilitates improved business agility, reduces costs, increases speed of business, and maintains the highest level of safety.

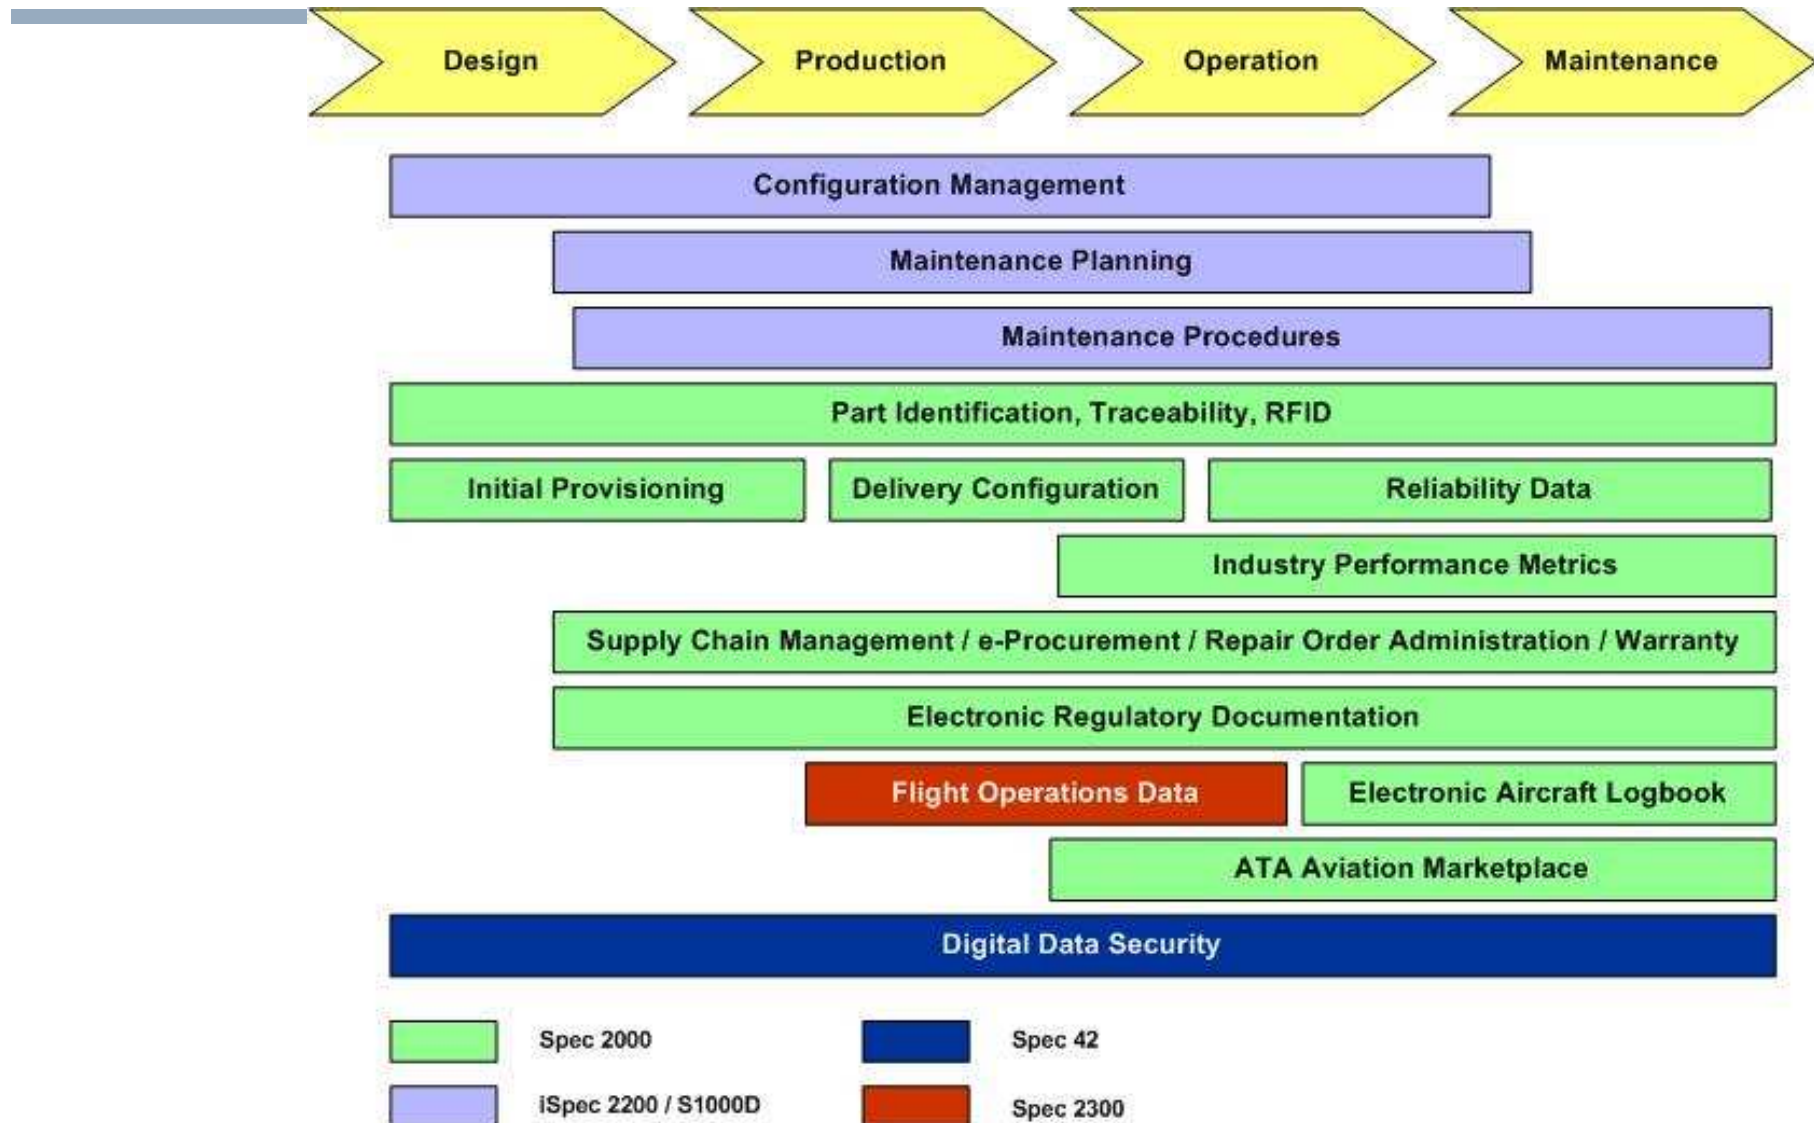

Guiding Principles

- Information-centric rather than document-centric
- Platform neutral – open architecture
- Consistent data structures, definitions and properties across all applications of the data
- Leverage other standards where applicable
- Enable an appropriate level of data security for the application
- Meet all applicable regulatory requirements

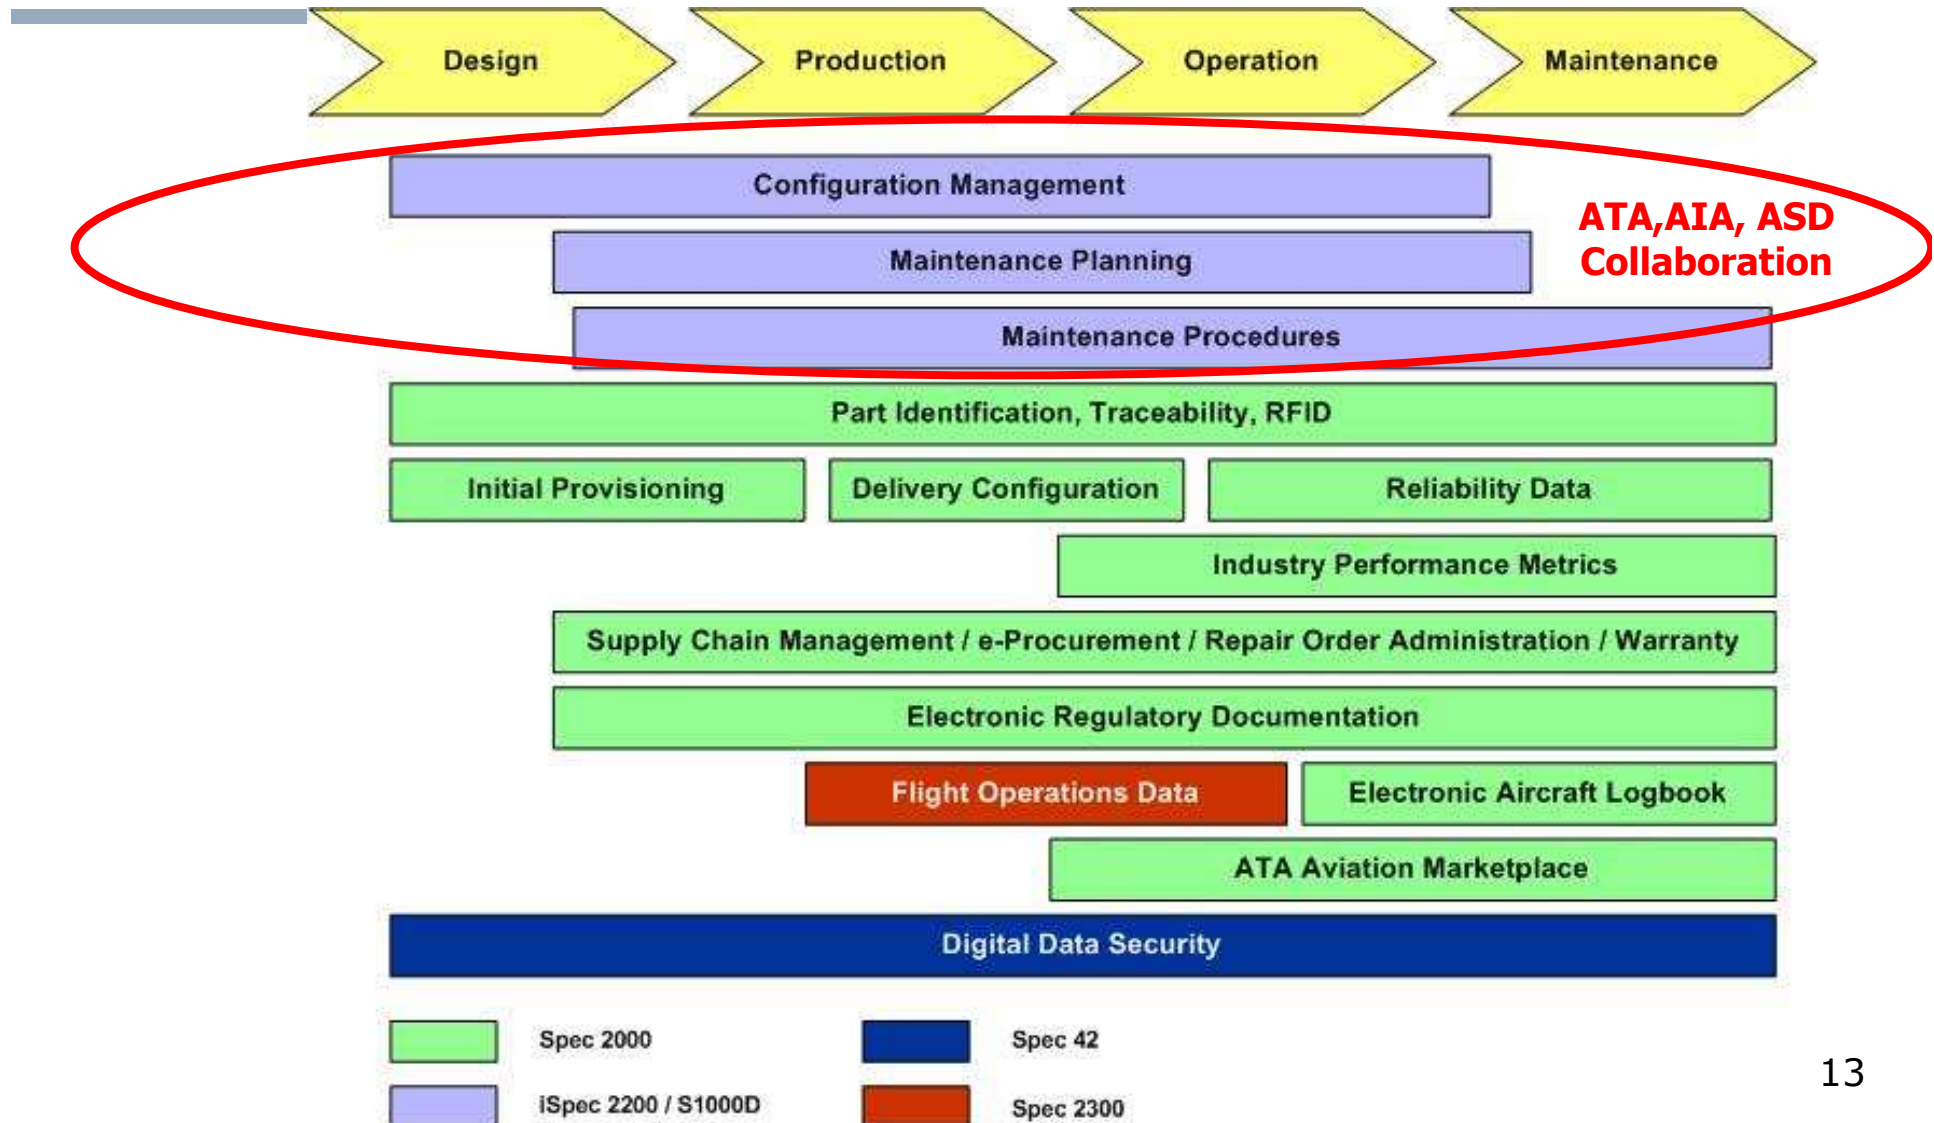

Functional Scope

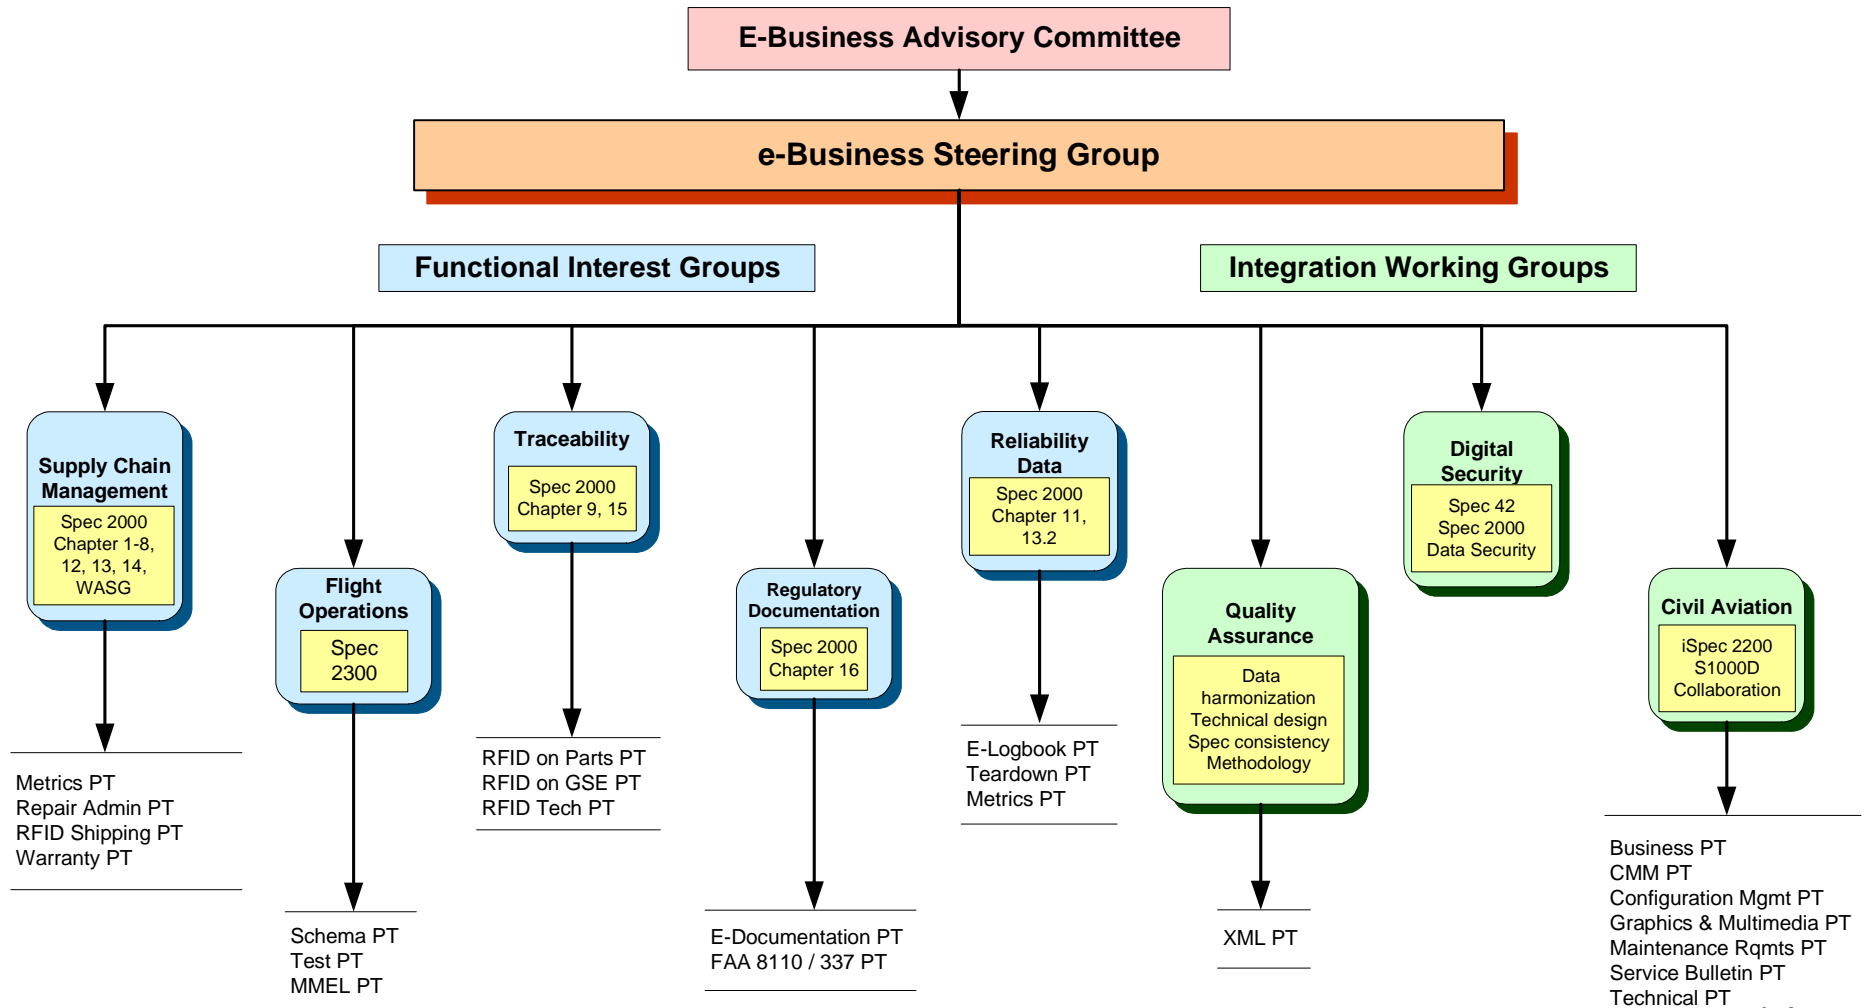

Functional Scope

ATA e-Business Committee Structure

Project List

- e-Logbook Standards
- Information Security Standards and Web Seminars
- Information Standards for Flight Operations Data
- Next Generation Technical Data Standards (S1000D)
- Regulatory Documentation Standards
- Reliability Data Standards
- Enhancements to Supply Chain Management Standards

Project List (cont'd)

- RFID Tags on Aircraft Parts
- RFID Tags to Support Part Shipments
- RFID Tags on Tools, Test and Ground Equipment
- Warranty Administration Standards
- XML Strategy for Quality, Consistency and Best Practices
- Industry Performance Metrics
- Repair Administration Standards
